This modern semi-detached house offers a lot of space both inside the house and outside. Because the two houses are built next to each other, there is plenty of room for a spacious garden. The house has a very well-designed layout so that the living room is surrounded by terraces. When you open the sliding doors of the living room, the indoor and outdoor living space becomes one. Each of the three bedrooms has its own bathroom, which offers a lot of comfort and privacy. There is a spacious utility room close to the kitchen with space for a washer/dryer and, for example, an extra refrigerator. The house comes with a double carport and solar panels on the roof. A private swimming pool is possible at an additional cost. Sustainability is important at this resort: excellent WiFi both in the homes and outside the secure shutter windows can be left open for ventilation even when you are not at home. All homes, as well as street lighting, are equipped with solar panels. Homes are well insulated and built on the wind, so that energy savings are achieved. Wide roof overhangs protect against the sun so that the house stays
